

Room Alert 4E is one of AVTECH's hardware solutions for "Advanced IT & Facilities Environment Monitoring, Alerting, & More". It is designed specifically to assist with computer room temperature and environment monitoring in multiple locations simultaneously while logging temperature and environment sensor status/data for immediate alert notification, historical review and graphing. Room Alert 4E allows alert notifications via email, email-to-SMS, SNMP and more to devices like computers, mobile phones, BlackBerrys, pagers and PDAs. Room Alert 4E offers an easy to use web browser interface for settings changes and viewing real-time temperature and environment sensor status from anywhere.

Front View

Back View

- Easy Ethernet 'Plug and Play' setup for immediate monitoring, logging & alerting.
- Includes internal digital temperature sensor and 2 digital sensor ports for connection of external digital temperature and/or digital temperature/humidity sensors.
- Includes the ability to ping up to 8 devices on the network and alarm if they do not respond.
- Includes 1 main power sensor and 1 switch sensor channel for connection of an external switch sensor such as power, flood, smoke, motion, air flow, room entry, panic buttons or others.
- Includes 1 Light Tower Connection Port for connection of AVTECH's External Light Tower or External Light Tower w/Audio
- Compatible with AVTECH's wall mount & ceiling mount kits for flexible mounting options.
- Includes AVTECH's Device ManageR and PageR Enterprise software for logging sensor data/status, graphing & alerting by all popular methods.
- Room Alert 4E package allows real-time temperature and environment monitoring, logging, one click data export, advanced alerting, Fahrenheit/Celsius, high/low watermarks, temperature values in alerts, more.
- Use Room Alert 4E with or without a host system. That's right...No PC Required! This saves money, improves reliability and provides options.

Room Alert 4E monitors environments like small phone or wiring closets, critical rack cabinets and larger computer rooms or data centers. Since Room Alert 4E is connected via Ethernet and does not require a host PC for operation, it can be located anywhere an Ethernet connection is available. Sensors can be run inside a rack cabinet, air vent, sub floor or other location. Room Alert 4E will help to protect valuable IT equipment and minimize downtime if a disaster does occur.

Protect Your IT Facility... Don't Wait Until It's Too Late!

This Package Includes:

- Room Alert 4E ID Box w/Ethernet
- One (1) built-in digital temperature sensor
- One (1) external digital temperature sensor w/25' RJ-11 cable
- Two (2) external digital sensor ports (front, 1 open) for connection of AVTECH's digital temperature or digital temperature/humidity sensors
- One (1) external power sensor w/25' cable and power adapter
- One (1) external switch sensor channel (front)
- One (1) Light Tower Connection Port (back) for connection of AVTECH's External Light Tower or External Light Tower w/Audio
- International 5V power adapter (110-240V, RoHS compliant)
- 10' Ethernet cable
- Built-in web server (web browser interface, alerts from ID box)
- Device Manager software license (included, no charge)
- PageR 10 Object Enterprise software license (included, no charge)
- CD installation & resource media
- Printed Room Alert 4E User's Guide & Reference Manual
- Printed Getting Started With PageR Enterprise manual
- 12 months of Maintenance Support & Update Service
- Toll free sales & technical support
- 30 Day Satisfaction Guarantee
- Hardware Replacement Guarantee
- AVTECH's almost 20 years of experience

* Additional sensors and international plug adapters are optionally available
