Santa Ana, Ca: Stancil Logging Recorder launches its latest release (version 3.4.12.2)

Stancil Corporation launched its latest release of its award winning software (as voted Hot Product during the 78th annual APCO Conference & Exposition at (Minneapolis Convention Center, Minneapolis).

The new Logger Web Player from Stancil allows users to search and play back recordings using a tablet, smart phone, or any Web enabled-device.

One reviewer liked the ability it gives supervisors 'to watch the telecommunicator's keystrokes while listening to the tape'

The Stancil Logging Recorder provides recording for VOIP and ROIP networks as well as all the traditional circuitry (analog, digital handsets T1 and E1). It has advanced indexing technology suited for migration to the NG91-1-1 environment. Recordings can be housed on numerous storage technologies (RAID, NAS, SAN or external recording media) to provide you with maximum reliability and confidentiality.

The Stancil Logging Recorder not only has geo-location capabilities but also shows the service type of call (RES, BUSN, PBX, VOIP etc). Working closely with the other manufacturers at ICE events, Stancil Corporation have been able to ensure the Stancil Logger meets the current NG9-1-1 standards. This process is continually evolving and Stancil Corporation is committed to ensure the Stancil Logging Recorder meets future regulations.

About Stancil Corporation: Stancil Corporation was founded in 1946 and still is a leading manufacturer of Logging and Recording products. It has made significant investment in NG-9-1-1 to ensure its customers have a successful migration to this new technology.
